2. Citations and explanations (Rule 70.7)

Claims 1-9

None of the documents cited in the international search report discloses or suggests a highly pure hafnium material with a purity of 4N-6N excluding gas components such as carbon, oxygen and nitrogen and a target or thin film comprising said material, wherein the zirconium content is 1-1000 wtppm or discloses the feature wherein said highly pure hafnium material is manufacturing using a method wherein an aqueous solution of chloride of hafnium is produced, the zirconium is removed therefrom using a solvent extract, thereafter hafnium oxide is produced using a neutralisation process, this is further chlorinated to give hafnium chloride, and the hafnium chloride is thereafter reduced to give a hafnium sponge. Moreover, these claims would not be obvious to a person skilled in the art.
